LinkedIn: <https://www.linkedin.com/in/danielpisani/>

Personal: danielpisani12@hotmail.com

Portfolio: <https://wellandgood.github.io/portfolio-personal/>

Working Registered Dietitian with a proven track-record in clinical nutrition and long-term care settings. Graduate from Ottawa University and progressing through a certificate in Full-Stack Web Development from Carleton University.

Currently knowledgeable in front-end development (HTML, CSS, JavaScript) and Python, and expanding knowledge in back-end development technologies such as Node.js and Express. Has varied experience in technology, music, foreign languages and politics.

Committed to learning technologies which will streamline both the medical and political spheres through innovation, which translates into learning full-stack web development, distributed systems, data sciences, natural language processing, blockchain, and machine learning.

Articulate communicator with outstanding relationship-building abilities, able to cultivate positive connections with clients, peers, medical professionals, and senior leadership. Versatile and flexible, willing to go above and beyond to achieve shared goals and to achieve positive change.

Professional Experience and Projects, Highlights

Vibe Musical - Musical Instrument Search Generator

URL: <https://wellandgood.github.io/BCS-Project-1/>

Technologies used: HTML, CSS, Javascript, APIs

- Features a search bar which, when submitted, uses APIs to return Wikipedia content and YouTube tutorial videos of a musical instrument.
- Features a randomizer button which submits one of 700+ instruments.

API Weather Project

URL: <https://wellandgood.github.io/DanielsWeatherNetwork/>

Technologies used: HTML, CSS, Javascript, APIs

- Features a search bar which, when submitted, uses APIs from the Open Weather Data database to return basic weather information of a given city.
- Uses Local Storage to save search history and presents it on the side of the page upon load.

Personal Scheduler

URL: <https://wellandgood.github.io/Personal-Scheduler-JS/>

Technologies used: HTML, CSS, Javascript, JQuery, Moment library

- Features a set of one-hour time blocks, set between 9 AM and 5 PM, with text areas. Each area has a respective save button which commits the text content to Local Storage when clicked.
- Saves the schedule and presents it on the page upon load.
